

# Return Service Inspection Form

Any issues our concerns with Millennium Technologies or Forward Motion's service will require a technical evaluation of the part(s) serviced in order to validate any type of warranty, **no exceptions**. This includes all issues related to cylinder or piston damage and/or failure.

All parts coming in for warranty evaluation require an RGA confirmation code. To obtain an RGA code, you will need to speak to one of our customer service representatives by calling 920-893-5595. Once you are given a code, you will need to fill out this form and include it with your shipment. Please mark the RGA number clearly on the outside of the box in thick black marker. Once received, your parts will be inspected and you will be given a call with the results.

In order to give a completely accurate technical evaluation we will need all top end parts such as: the cylinder, head, piston, and gaskets. Missing parts will cause a delay in evaluation, and ultimately a delay in assisting with your requests. Please make sure all parts are shipped securely to avoid any further damage.

Further information regarding what is considered justifiable warranty work can be found at our website: [www.mt-llc.com](http://www.mt-llc.com)

**Fill out and include this entire form with your RGA shipment:**
